

Alexander Wang by Christian Lahoude Studio, Hong Kong

September 12th, 2014 by retail design blog

A 720sqft shop-in-shop in the Sogo shopping center of Hong Kong that utilizes the *Alexander Wang* concept developed by Christian Lahoude Studio in collaboration with Mr. Wang. The store, which opened in September 2014, implements a floating shelving unit, duratrans displays, minimalist furniture, terrazzo, white Italian Carrera, black Nero Marquina marble, and polished bronze metal. The contrasting black and white is complemented with a balance of transparency and opacity.
